

## Unit 4B – Developing images using repeating patterns

### **Level 3**

Pupils begin to organise their tasks and use ICT to create, organise, amend and present information and ideas. They find information from a range of given sources and use ICT to search, sort and/or graph data to follow simple lines of enquiry. Pupils understand how changing one variable affects another in models or simulations. They store and retrieve work independently. Pupils send and receive information electronically, with support. They understand the use of a range of input and output devices.

### **Teacher commentary:**

In this unit children have used an art package to create an initial design using a variety of tools. They have selected part of that image to create a stamp, then used it to create a repeating pattern or design. Some children tiled the image to produce a repeating pattern.
